

Count how many. Write the number in the box.
Draw a line to show how you counted the suns.

A group of 7 suns arranged in a path. Lines connect the suns in the following order: bottom-left, top-left, top, middle-right, top-right, middle-right, and bottom-right. A box to the right of the suns contains the number 7.

This is a great strategy to help your child learn one-to-one correspondence.

Count how many. Write the number in the box.
Draw a line to show how you counted the circles.

A group of 8 circles arranged in a cluster. An empty box is located to the right of the circles for the student to write the count.
