

1) Is your number odd or even?

2) List your number's multiples. (Count by your number.)

3) Create 2 number sentences where your number is the sum.

4) Create 2 number sentences where your number is the difference.

5) Create a multiplication problem with your number.

6) Cut out five magazine pictures showing your number in them.

7) Create and draw a fraction with your number as the denominator.

8) Create and draw a fraction with your number as the numerator.

9) Create a pattern with your number.

10) Write a paragraph telling why you choose your number.

11) Use your number showing the time.

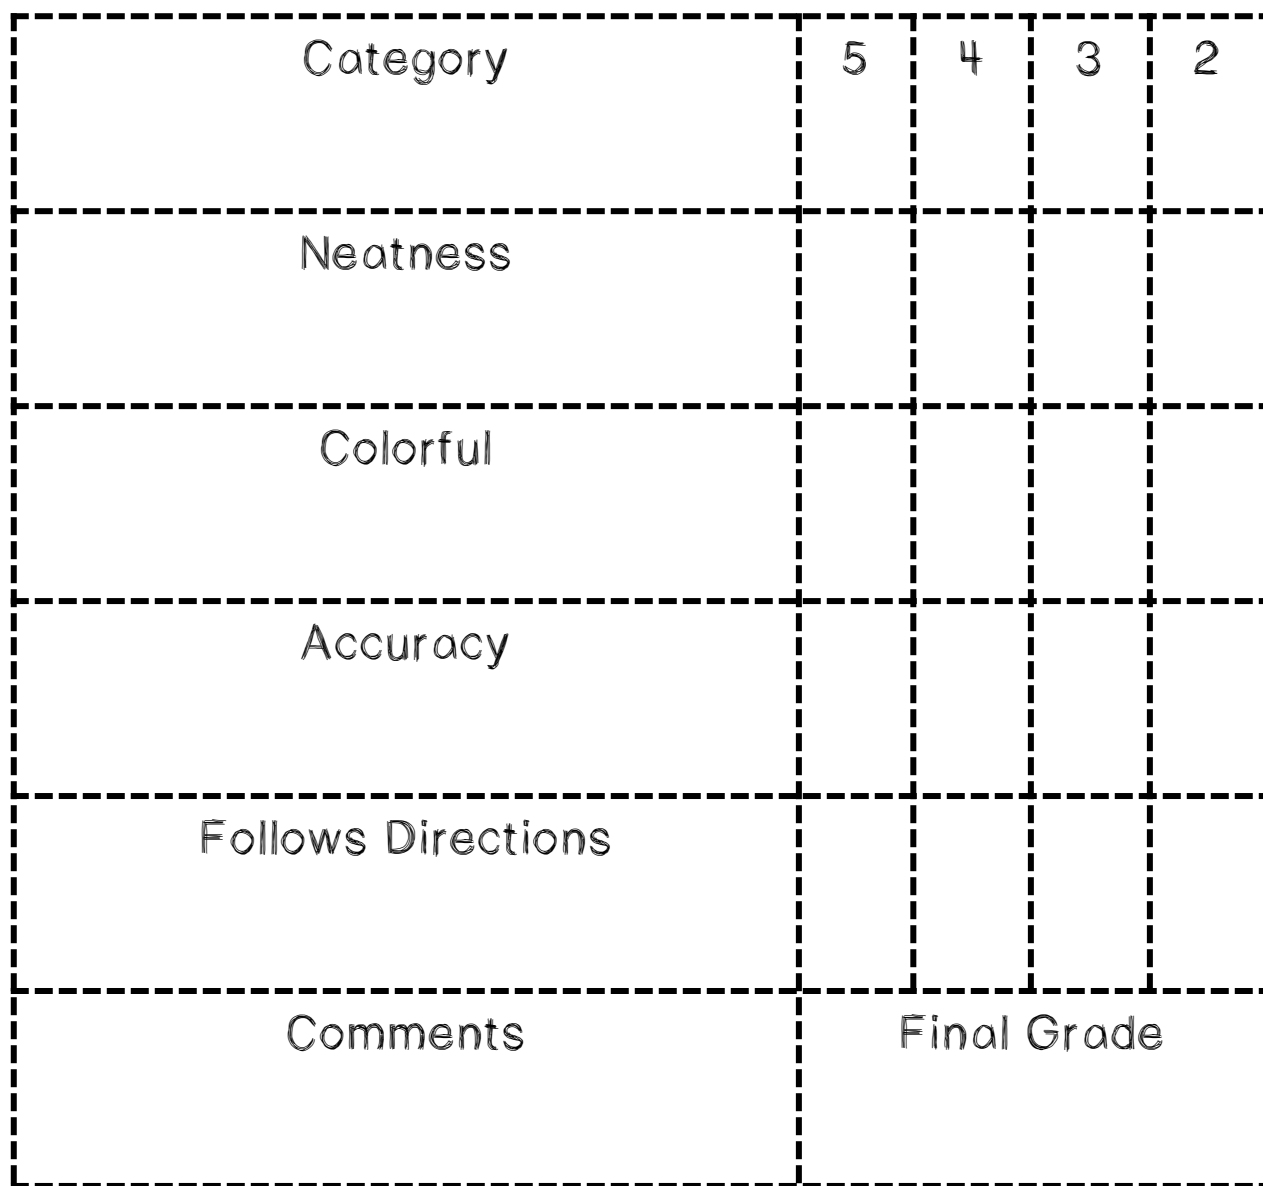

12) Express your number in money.

13) Create a number line showing your number.

14) Create a story problem using your number.

15) Draw or create a picture or design that hides but integrates your number into its design.

Fold your paper to make 16 squares. Number each box with the numbers 1-15 using the last square for your name and information. Then follow each of the steps using YOUR favorite number! Make your poster nice, neat, and colorful!
