Cut out the picture of the string at the bottom of the page. Compare the string with each object to see which is longer. Use the line next to each object to help you compare. Color objects shorter than the string green. Color objects longer than the string orange.

On the back of your paper, draw something longer than, shorter than, and the same length as the picture of the string on the back of your paper. Color objects shorter than the string green. Color objects longer than the string orange.

Using the piece of string from class, find three items at home that are shorter than your piece of string and three items that are longer than your piece of string. Draw a picture of those objects on the chart. Try to find at least one thing that is about the same length as your string, and draw a picture of it on the back.

Shorter than the string

Longer than the string

Talk to your child about what it means when something is longer or shorter than something else.
